INDEX TO VOLUME 283

January–June 1967

SUBJECT INDEX

Papers are listed under subject headings with authors' names in parentheses following title of paper. Authors are listed with titles of their papers in alphabetical order in the Author Index. Entries with (BC) are Brief Communications.

A

Aerodynamics. On the prediction of optimum hypersonic shapes (Miele), 169 (BC)

Aeroelastic systems. Comments on Parks' note (Wang), 430 (BC)

Aeroelastic systems. Liapunov functionals for aeroelastic problems (Parks), 426 (BC)

Affine transformation. Transition graphs of affine transformation on vector spaces over finite fields (Wang), 55

Antenna aperture distribution. On the problem of optimum antenna aperture distribution (Fong), 235

Antenna pattern synthesis. On the problem of optimum antenna aperture distribution (Fong), 235

Applied mathematics. Minimum energy problems in Hilbert function space (Kuo and Kazda), 38

Autonomous machine. Transition graphs of affine transformation on vector spaces over finite fields (Wang), 55

B

Betti's law, application of. A simple interpretation of generalized forces using Betti's law (Rubinstein), 73

Book Reviews

Advances in Water Pollution research, Vols. I, II, III, Proc. 2nd Intern. Conf., Tokyo, 1964, 179

Alexander, A. F. O'D.: The planet Uranus, a history of observation, theory, and discovery, 180

Ashton, Winifred D.: The theory of road traffic flow, 347

Athans, Michael and Peter L. Falb: Optimal control: an introduction to the theory and its applications, 350

Baker, Bernard S. (edited by): Hydrocarbon fuel cell technology, 262

Book Reviews (Continued)

Blaauw, Adriaan and Maarten Schmidt (edited by): Galactic structure, 81

Bremermann, Hans: Distributions, complex variables and Fourier transforms, 82

Bunker, Don L.: Theory of elementary gas reaction rates, 261

Butler, G. and H. C. K. Ison: Corrosion and its prevention in waters, 439

Caianiello, E. R. (edited by): Automata theory, 442

Caratheodory, C.: Calculus of variations and partial differential equations of the first order, Vol. I, 88

Corbett, James W.: Electron radiation damage in semiconductors and metals, 348

Cox, R. N. and L. F. Crabtree: Elements of hypersonic aerodynamics, 178

Davies, J. T.: The scientific approach, 346

de Leeuw, J. H. (edited by): Rarefied gas dynamics, Vols. I and II, 349

de Mevergnies, Nève *et al.*: Nuclear structure study with neutrons, 345

Dorfman, Ya. G.: Diamagnetism and the chemical bond, 267

Ebert, M. and A. Howard (edited by): Current topics in radiation research, Vol. 2, 347

El'sgol'ts, L. E.: Introduction to the theory of differential equations with deviating arguments, 268

Feller, William (edited by): An introduction to probability theory and its applications, Vol. II, 438

Frihagen, Jon (edited by): Electron density profiles in ionosphere and exosphere, 260

Gardner, Floyd M.: Phaselock techniques, 433

Book Reviews (Continued)

Goodjohn, Albert J. and G. C. Pomraning (edited by): Reactor physics in the resonance and thermal regions, Vols. I & II, 437

Greebler, Paul and Ernest J. Henley (edited by): Advances in nuclear science and technology, Vol. III, 434

Halanay, A.: Differential equations: stability oscillations and time lags, 82

Hartmanis, J. and R. E. Stearns: Algebraic structure theory of sequential machines, 182

Holt, Maur[illegible]ted by): Basic development[illegible] dynamics, Vol. I, 352

Howard, [illegible] and W. B. Templeton: Human spa[illegible] orientation, 266

Jammer, Max: The conceptual development of quantum mechanics, 259

Karni, Shlomo: Network theory: Analysis and synthesis, 86

Kauzmann, W.: Kinetic theory of gases, 178

Kraus, John D.: Radio astronomy, 175

Krivoglaz, M. A. and A. A. Smirnov: The theory of order-disorder in alloys, 85

Kunkel, W. B. (edited by): Plasma physics in theory and application, 437

Kuo, Franklin K. and James F. Kaiser (edited by): System analysis by digital computer, 440

Leontovitch, M. A. (edited by): Reviews of plasma physics, Vol. I, 85

Lietzmann, W.: Visual topology, 349

Magnus, Wilhelm *et al.*: Combinatorial group theory, 349

Magnus, Wilhelm and Stanley Winkler: Hill's equation, 177

Markushevitch, A. I.: Entire functions, 176

Martin, L. C.: The theory of the microscope, 84

McKinley, T. D. *et al.* (edited by): The electron microprobe, 265

Miller, M. L.: The structure of polymers, 434

Munn, R. E.: Descriptive micrometeorology, 435

Powell, C. F. *et al.* (edited by): Vapor deposition, 181

Prigogine, I. (edited by): Advances in chemical physics, Vol. IX, 262

Proskauer, E. S. *et al.* (edited by): Perspectives in polymer science, 179

Book Reviews (Continued)

Riley, J. P. and G. Skirrow (edited by): Chemical Oceanography, Vol. II, 266

Sarner, Stanley F.: Propellant chemistry, 351

Segrè, Emilio (edited by): Annual review of nuclear science, 435

Shklovskii, I. S.: Physics of the solar corona, 261

Soloukhin, R. I.: Shock waves and detonations in gases, 182

Tolstoy, Ivan and C. S. Clay: Ocean acoustics, 345

Tonnelat, M. A.: Einstein's theory of unified fields, 263

Turro, N. J.: Molecular photochemistry, 436

Vainshtein, B. K.: Diffraction of x-rays by chain molecules, 84

Wasow, Wolfgang: Asymptotic expansions for ordinary differential equations, 83

Whitehead, George W.: Homotopy theory, 265

Willardson, R. K. and Albert C. Beer (edited by): Semiconductors and semimetals, Vol. II: Physics of III–V compounds, 433

Williams, M. M. R.: The slowing down and thermalization of neutrons, 350

Wu, C. S. and S. A. Moszkowski: Beta decay, 176

Boundary layer. Concentration-dependent diffusion in a semi-infinite medium (Hays and Curd), 300

C

Calculus of variations. On the prediction of optimum hypersonic shapes (Miele), 169 (BC)

Calculus of variations. Some new results in optimal final value control theory (Pfeiffer), 404

Circuit theory. On the decomposition of a complete graph into planar subgraphs (Shirakawa *et al.*), 379

Complementary variational principle for heat transfer. Complementary forms of the variational principle for heat conduction and convection (Biot), 372

Conductors, lightning. The lightning conductor (Golde), 451

Control theory. Some new results in optimal final value control theory (Pfeiffer), 404

Corona currents. Novel observations on lightning discharges: Results of research on Mount San Salvatore (Berger), 478

D

Diffusion, concentration dependent. Concentration-dependent diffusion in a semi-infinite medium (Hays and Curd), 300

Dipole, electric. The fields of an electric dipole in motion (Mott, Hoadley, and Davis), 91

Discrete N dimensional transfer function approximation. A method for discrete system identification and approximation (Mintz and Thorp), 389

Discrete system approximation. A method for discrete system identification and approximation (Mintz and Thorp), 389

Discrete system identification. A method for discrete system identification and approximation (Mintz and Thorp), 389

Dynamical analysis, state functions. State function approach to system analysis (Seely and Goldstein), 187

Dynamic programming of optimum flows. Optimum flows in general communication networks (Onaga), 308

E

Electricity. Lightning and transmission lines (Wagner), 558

Electricity. Novel observations on lightning discharges: Results of research on Mount San Salvatore (Berger), 478

Electricity. Physics of the thunderstorm electric circuit (Malan), 526

Electricity. The lightning conductor (Golde), 451

Electricity. The production of thunderstorm electricity (Workman), 540

Ergodic theory. An ergodic theorem and its generalization (Wolf), 286

Extension of the max-flow min-cut theorem. Optimum flows in general communication networks (Onaga), 308

F

Filtering theory. Self-adjusting controllers for linear systems with correlated disturbances (Ula and Kim), 118

Finite deformation of elastic bodies, torsion. Geometrically nonlinear torsion of an aelotropic cylinder (Rao), 139

Finite strain in aelotropic materials, torsion. Geometrically nonlinear torsion of an aelotropic cylinder (Rao), 139

Finite torsion of an aelotropic cylinder. Geometrically nonlinear torsion of an aelotropic cylinder (Rao), 139

Flow. Heat transfer in Couette flow of Bingham material with linearly varying wall temperature (Kumar and Jain), 250 (BC)

Franklin Institute

Library of The Franklin Institute: *see* main index

Meetings: *see* main index

G

Generalized forces, application of. A simple interpretation of generalized forces using Betti's law (Rubinstein), 73

Generalized forces using Betti's law. A simple interpretation of generalized forces using Betti's law (Rubinstein), 73

Graph theory. On the decomposition of a complete graph into planar subgraphs (Shirakawa *et al.*), 379

Graphs. Transition graphs of affine transformation on vector spaces over finite fields (Wang), 55

H

Heat transfer. Complementary forms of the variational principle for heat conduction and convection (Biot), 372

Heat transfer. Heat transfer in Couette flow of Bingham material with linearly varying wall temperature (Kumar and Jain), 250 (BC)

Heat transfer. Melting of a half-space subjected to a constant heat input (Cohen), 271

Human engineering. Manual control of single-loop systems (McRuer, Graham and Krendel), Part I: 1; Part II: 145

Human response. Manual control of single-loop systems (McRuer, Graham and Krendel), Part I: 1; Part II: 145

L

Liapunov functions. The companion matrix and Liapunov functions for linear multivariable time-invariant systems (Power), 214

Library of The Franklin Institute, New Books, 89, 184, 269, 355, 445

Lightning. Lightning and transmission lines (Wagner), 558

Lightning. Novel observations on lightning discharges: Results of research on Mount San Salvatore (Berger), 478
Lightning. Physics of the thunderstorm electric circuit (Malan), 526
Lightning. The lightning conductor Golde), 451
Lightning. The production of thunderstorm electricity (Workman), 540
Loss or gain of flows in communication nets. Optimum flows in general communication networks (Onaga), 308

M

Manual control. Manual control of single-loop systems (McRuer, Graham and Krendel), Part I: 1; Part II: 145
Matrix differential equations. A perturbation method for the solution of linear matrix differential equations (Pipes), 357
Mechanical oscillator. Thermally self-excited mechanical oscillators (Cunningham and Reich), 30
Meetings of The Franklin Institute: Minutes of the Stated Meetings: December 21, 1966, 90; January 18, 1967, 185; February 15, 1967, 270; March 15, 1967, 356; April 19, 1967, 450
Melting. Melting of a half-space subjected to a constant heat input (Cohen), 271
Membership Roll of Honor: 446
Modern control theory. Minimum energy problems in Hilbert function space (Kuo and Kazda), 38
Modified yield condition. Plastic strength of anisotropic rotating discs (Bratt), 339 (BC)
Moving band. Torsional vibration of a moving band (Alspaugh), 328
Multiple measurement. On sampled data systems with cyclically varying rates (Franaszek and Liu), 102
Multivariable systems. The companion matrix and Liapunov functions for linear multivariable time-invariant systems (Power), 214

N

Nonlinear oscillator. Thermally self-excited mechanical oscillators (Cunningham and Reich), 30
Non-uniform sampling and reconstruction. On sampled data systems with cyclically varying rates (Franaszek and Liu), 102
Non-uniform transmission lines. A perturbation method for the solution of linear matrix differential equations (Pipes), 357

O

Optimal control. Minimum energy problems in Hilbert function space (Kuo and Kazda), 38
Optimization theory. On the prediction of optimum hypersonic shapes (Miele), 169 (BC)
Optimization theory. Some new results in optimal final value control theory (Pfeiffer), 404
Optimum antenna aperture. On the problem of optimum antenna aperture distribution (Fong), 235
Optimum control. Self-adjusting controllers for linear systems with correlated disturbances (Ula and Kim), 118
Oscillator. Thermally self-excited mechanical oscillators (Cunningham and Reich), 30

P

Partial differential equations. Comments on Parks' note (Wang), 430 (BC)
Partial differential equations. Liapunov functionals for aeroelastic problems (Parks), 426 (BC)
Perturbation theory. A perturbation method for the solution of linear matrix differential equations (Pipes), 357
Planar graphs. On the decomposition of a complete graph into planar subgraphs (Shirakawa *et al.*), 379
Plasticity. On elastic-plastic wave propagation (Fine), 203
Potentials, relativistic. The fields of an electric dipole in motion (Mott, Hoadley and Davis), 91
Probability theory. An ergodic theorem and its generalization (Wolf), 286

R

Radiation, dipole. The fields of an electric dipole in motion (Mott, Hoadley and Davis), 91
Rotating discs. Plastic strength of anisotropic rotating discs (Bratt), 339 (BC)

S

Sampled data systems. On sampled data systems with cyclically varying rates (Franaszek and Liu), 102

Stability. Comments on Parks' note (Wang), 430 (BC)
Stability. Liapunov functionals for aeroelastic problems (Parks), 426 (BC)
Stability. The companion matrix and Liapunov functions for linear multivariable time-invariant systems (Power), 214
State function. State function approach to system analysis (Seely and Goldstein), 187
Stochastic control. Self-adjusting controllers for linear systems with correlated disturbances (Ula and Kim), 118
Stochastic processes. An ergodic theorem and its generalization (Wolf), 286
Stress-Strain. Heat transfer in Couette Flow of Bingham material with linearly varying wall temperature (Kumar and Jain), 250 (BC)
System analysis, state function approach. State function approach to system analysis (Seely and Goldstein), 187

T

Thermalization. Melting of a half-space subjected to a constant heat input (Cohen), 271
Thunderstorm electric circuit. Physics of the thunderstorm electric circuit (Malan), 526
Thunderstorm electricity. The production of thunderstorm electricity (Workman), 540
Torsional vibrations. Torsional vibration of a moving band (Alspaugh), 328
Transmission lines. Lightning and transmission lines (Wagner), 558

U

Unloading waves. On elastic-plastic wave propagation (Fine), 203

V

Variational methods, diffusion. Concentration-dependent diffusion in a semi-infinite medium (Hays and Curd), 300
Variational principle. Complementary forms of the variational principle for heat conduction and convection (Biot), 372
Vibrations. Torsional vibration of a moving (Alspaugh), 328

W

Wave propagation. On elastic-plastic wave propagation (Fine), 203

Y

Yield condition. Plastic strength of anisotropic rotating discs (Bratt), 339 (BC)

AUTHOR INDEX

Full titles of papers are listed only under first authors; all co-authors are cross-refereneed.

INDEX TO VOLUME 284

July-December 1967

SUBJECT INDEX

Papers are listed under subject headings with author's names in parentheses following title of paper. Authors are listed with titles of their papers in alphabetical order in the Author Index. Entries with (BC) are Brief Communications.

A

Adaptive control. Remarks on a paper by Sworder (Maslov), (BC), 144
Reply to the remarks of Maslov (Sworder), (BC), 146
Applied mechanics. On complementary variational principles in linear vibrations (Karnopp), 56
Associative memory. A cryogenic associative memory (Yang and Tou), 109

B

Ballantine Medal: Jack N. James and Robert J. Parks, 210
Beams. Natural frequencies of beams and plates on an elastic foundation with a constant modulus (Stafford), (BC), 262
Bendixson theorem extension. Periodic response of an autonomous hysteretic system (Bickart), 229
Book Reviews
Arzelies, Henri: Relativistic kinematics, 73
Bailey, Norman T. J.: The mathematical approach to biology and medicine, 275

Wijn, H. P. J. (edited by): Ferromagnetism: Encyclopedia of physics, Vol. 18/2, 270

Williams, L. Pearce: Michael Faraday: A biography, 198

Book Reviews (Continued)

Wolff, Edward A.: Antenna analysis, 71

Zichichi, A. (edited by): Recent developments in particle symmetries, 70

Boundary value problems. Flow graphs and boundary value problems (Feeser and Feng), 251

Brown Medal: Carl Koch, 209

Buckling. Bending of an annular slab supported on columns (Agabein, Lee and Dundurs), 300

Creep buckling of cylindrical shells under axial compression (French, Patel & Venkatraman, (BC), 320

Nature of roots occurring in buckling equations for circular plates on elastic foundations (Kline and Peck), (BC), 326

C

Clamer Medal: Paul Schwarzkopf, 210

Committee on Science and the Arts: Abstracts of Meetings: October 12, 1966, 209; March 8, 1967, 209; April 12, 1967, 209; May 10, 1967, 210; June 14, 1967, 210

Communication networks. On the optimum synthesis of statistical communication networks (Frank and Hakimi), 407

Contour mapping. On searching a contour map for a given terrain elevation profile (Freeman and Morse), 1

Control systems. On the stability of homogeneous, nuclear reactors (Albertoni, Cellina and Szego), 279

Creep. Creep buckling of cylindrical shells under axial compression (French, Patel & Venkatraman), (BC), 320

Crystallography. Reminiscences of fifty years of research (Bragg), 211

Cylindrical shells. Forced, axi-symmetric motions of cylindrical shells (Reismann and Padlog), 308

D

Discrete systems. Volterra functional analysis of nonlinear time-varying systems (Ku and Su), 344

E

Elasticity. Nature of roots occurring in buckling equations for circular plates on elastic foundations (Kline and Peck), (BC), 326

Electromagnetic interaction. Relativistic Schrödinger equation for a particle with arbitrary spin (Ionesco-Pallas), 243
Electrons. Verification of an approximate formula for multiple scattering of slow electrons (Kagiwada and Kalaba), 122
Energy methods. On energy-derived difference equations in thermal stress problems (Havner and Stanton), 127

F

Fibers. The stress, strain and displacement fields in a composite material reinforced with discontinuous fibers (Cohen and Romualdi), 388
Finite differences. Flow graphs and boundary value problems (Feeser and Feng), 251
On energy-derived difference equations in thermal stress problems (Havner and Stanton), 127
Flow graphs. Flow graphs and boundary value problems (Feeser and Feng), 251
Four-bar linkage. The parametric method of synthesis of the four-bar linkage (Wojcik), 366
Franklin Institute
Committee on Science and the Arts: *see* main index
Library of the Franklin Institute: *see* main index
Meetings: *see* main index
Franklin Medal: Murray Gell-Mann, 210
Frequency domain stability criterion. Absolute stability of a class of nonlinear systems containing distributed elements (Blodgett and King), 153
Functional analysis. The parametric method of synthesis of the four-bar linkage (Wojcik), 366

G

Gell-Mann, Murray: Franklin Medal, 210
Goertz, Raymond C.: Longstreth Medal, 209

I

Impedance matrix synthesis. N-port synthesis of N-order positive entry resistance matrices (Brown), 26
Impedance of systems. Impedance of a linear system with anisotropic coefficients (Wang), 161
Interpolation. Interpolation with positive-real functions (Youla and Saito), 77
Invariant imbedding. Verification of an approximate formula for multiple scattering of slow electrons (Kagiwada and Kalaba), 122

J

James, Jack N.: Ballantine Medal, 210

K

Koch, Carl: Brown Medal, 209

L

Liapunov functions. On the stability of homogeneous, nuclear reactors (Albertoni, Cellina and Szego), 279
Library of The Franklin Institute, New Books, 151, 207, 339, 435
Lienard construction. On obtaining the time response from the extended Lienard construction (Kroin and Soudack), (BC), 193
Linear systems. Impedance of a linear system with anisotropic coefficients (Wang), 161
Loads. Bending of an annular slab supported on columns (Agabein, Lee and Dundurs), 300
Noncircular rings under shear load (Romano and Ranlet), 283
Longstreth Medal: Raymond Corlis Goertz, 209

M

Materials science. The stress, strain and displacement fields in a composite material with discontinuous fibers (Cohen and Romualdi), 000
Medal Day Proceedings, 417
Meetings of The Franklin Institute: Minutes of the Stated Meetings: May 17, 1967, 152; Oct. 18, 1967, 340; Nov. 15, 1967, 436
Memory circuit. A cryogenic associative memory (Yang and Tou), 109
Moll, John L.: Potts Medal, 210
Multiple scattering. Verification of an approximate formula for multiple scattering of slow electrons (Kagiwada and Kalaba), 122

N

Networks. On the optimum synthesis of statistical communication networks (Frank and Hakimi), 407

Network synthesis. N-port synthesis of N-order positive entry resistance matrices (Brown), 26

Network theory. Interpolation with positive-real functions (Youla and Saito), 77

Nonlinear systems. On obtaining the time response from the extended Lienard construction (Kroin and Soudack), (BC), 193

Periodic response of an autonomous, hysteretic system (Bickart), 229

Volterra functional analysis of nonlinear time-varying systems (Ku and Su), 344

N-port synthesis. N-port synthesis of N-order positive entry resistance matrices (Brown), 26

O

Optimum control. On the optimum synthesis of statistical communication networks (Frank and Hakimi), 407

Oscillators. Periodic response of an autonomous, hysteretic system (Bickart), 229

P

Parametric synthesis. The parametric method of synthesis of the four-bar linkage (Wojcik), 366

Parks, Robert J.: Ballantine Medal, 210

Particles. Elementary particles (Gell-Mann), 341

Particle physics. Elementary particles (Gell-Mann), 341

Particle spin. Relativistic Schrödinger equation for a particle with arbitrary spin (Ionesco-Pallas), 243

Phase-plane method. On obtaining the time response from the extended Lienard construction (Kroin and Soudack), (BC), 193

Plates. Bending of an annular slab supported on columns (Agabein, Lee and Dundurs), 300

Natural frequencies of beams and plates on an elastic foundation with a constant modulus (Stafford), (BC), 262

Nature of roots occurring in buckling equations for circular plates on elastic foundations (Kline and Peck), (BC), 326

Popov stability of distributed systems. Absolute stability of a class of nonlinear systems containing distributed elements (Blodgett and King), 153

Potts Medal: John L. Moll, 210

R

RC-systems. On the analysis of composite lumped-distributed systems (Kelly, Ghausi and Mulligan), 170

Redding Lecture. Reminiscences of fifty years of research (Bragg), 211

Rings. Noncircular rings under shear load (Romano and Ranlet), 283

S

Sampled hold systems. The X-transform and its use in sampled-data system analysis (McDaniel and Phillips), 39

Sampler-zero-order-hold transform. The X-transform and its use in sampled-data system analysis (McDaniel and Phillips), 39

Schwarzkopf, Paul: Clamer Medal, 210

Sequential circuitry. A cryogenic associative memory (Yang and Tou), 109

Shells. Creep buckling of cylindrical shells under axial compression (French, Patel, & Venkatraman), (BC), 320

Forced, axi-symmetric motions of cylindrical shells (Reismann and Padlog), 308

Signal design. Interpolation with positive-real functions (Youla and Saito), 77

Spin. Relativistic Schrödinger equation for a particle with arbitrary spin (Ionesco-Pallas), 243

Stability. On the stability of homogeneous, nuclear reactors (Albertoni, Cellina and Szego), 279

Absolute stability of a class of nonlinear systems containing distributed elements (Blodgett and King), 153

Stress. The stress, strain and displacement fields in a composite material reinforced with discontinuous fibers (Cohen and Romualdi), 388

Structures. Forced, axi-symmetric motions of cylindrical shells (Reismann & Padlog), 308
Noncircular rings under shear load (Romano and Ranlet), 283
Systems analysis. On the analysis of composite lumped-distributed systems (Kelly, Ghausi and Mulligan), 170
Systems impedance. Impedance of a linear system with anisotropic coefficients (Wang), 161

T

Terrain elevation profile. On searching a contour map for a given terrain elevation profile (Freeman and Morse), 1
Thermal stress. On energy-derived difference equations in thermal stress problems (Havner and Stanton), 127
The X-transform. The X-transform and its use in sampled-data system analysis (McDaniel and Phillips), 39
Topography. On searching a contour map for a given terrain elevation profile (Freeman and Morse), 1
Transmission lines. On the analysis of composite lumped-distributed systems (Kelly, Ghausi and Mulligan), 170

V

Variational methods. On complementary variational principles in linear vibrations (Karnopp), 56
Vibrations. Natural frequencies of beams and plates on an elastic foundation with a constant modulus (Stafford), (BC), 262
On complementary variational principles in linear vibrations (Karnopp), 56
Volterra functions. Volterra functional analysis of nonlinear time-varying systems (Ku and Su), 344

W

Wetherill Medal: Ernest Omar Wollan, 209
Wollan, Ernest O.: Wetherill Medal, 209

X

X-ray crystallography. Reminiscences of fifty years of research (Bragg), 211

AUTHOR INDEX

Full titles of papers are listed only under first authors; all co-authors are cross-referenced.
